

## RECTIFYING A FEW ERRORS IN THE ROMANIAN EXSICCATAE

CIOCÂRLAN VASILE \*

**Résumé:** l'auteur publie les erreurs rencontrées dans les exsiccates: FRE=Flora Romaniae Exsiccata; FOE=Flora Olteniae Exsiccata; FMD= Flora Moldaviae et Dobrogeae Exsiccata; FEGL= Flora Exsiccata Graminearum et Leguminosarum Romaniae. En même temps, on publie le nom correct.

**Mots-clé:** erreurs, exsiccates, Roumanie.

The correct identification of the fitotaxons from a geographical or administrative region is a hard work, full of responsibilities. It is very hard to eliminate an error occurring in the literature, that is why it is perpetuated and it appears in subsequent publications. Taking about exsiccates, the errors are distributed at similar institutions in- and outward. The informations from the exsiccates is credible and become a standard, that is why the botanists use them in order to determine the floristic material.

The correct identification of the species became more important due to the requirement of knowing the areal of the species, of their distribution and correct mapping of their distribution, as well as the necessity of protecting those rare and vulnerable species.

In the present paper, we shall mention a few errors, occurring in the Romanian exsiccates, thinking that the authors should analyse more patiently and with better references the floristic material and then they should pronounce on the nomenclature and the systematic value of a certain taxa.

The information is presented in a table; the left part consists of the name and the value of the taxon from the various Romanian exsiccatae, while the right part present the correct name and value of the taxa. The abbreviations of the exsiccatae are: FRE=Flora Romaniae Exsiccata; FOE=Flora Olteniae Exsiccata; FMD= Flora Moldaviae et Dobrogeae Exsiccata; FEGL= Flora Exsiccata Graminearum et Leguminosarum Romaniae. The taxa are alphabetically presented:

The name of the species in the exsiccatae	The correct name of the taxa
<i>Achillea collina</i> Becker ex Rchb. FOE 1057	<i>A. setacea</i> Waldst. et Kit.
<i>Ajuga chamaepitys</i> (L.) Schreb. FOE 717	<i>A. pseudochia</i> Schost.
<i>Ajuga chamaepitys</i> (L.) Schreb. FRE 2071	<i>A. pseudochia</i> Schost.
<i>Alyssum saxatile</i> FOE 238	<i>A. saxatile</i> subsp. <i>orientale</i> (Ard.) Rech. f.
<i>Aristolochia pallida</i> Willd. FRE 1469	<i>A. lutea</i> Desf.
<i>Asparagus maritimus</i> (L.) Mill. FRE 941	<i>A. officinalis</i> L.
<i>Callitricha verna</i> L. FOE 629	<i>C. cophocarpa</i> Sendtn.
<i>Carduus nutans</i> L. FRE 2081	<i>C. thoermeri</i> Weinm.
<i>Carex praecox</i> Schreb. FRE 1876	<i>C. praecox</i> Schreb. subsp. <i>intermedia</i> (Čelak.) Schultze-Motel
<i>Centaurea napulifera</i> Roch. FRE 2074	<i>C. thirkei</i> Schult.-Bip.
